Enhancements

Email Notification to Transfer Cart user if transaction is deleted

If a user transfers a cart to a Checkout user to complete a transaction, and the Checkout user deletes the transaction or all of the transferred items, the Transfer Cart user will receive an email notification indicating the items will not be purchased.

Manage tab: Ability to add or delete non-catalog items

Users with the Manage tab privilege will have the ability to add or delete non-catalog items from a transaction if the transaction is active in the Manage tab. This functionality allows users to adjust a transaction that was the result of a sourcing event.

To add a non-catalog item, select the Add Item option from the Next Step drop-down and click the Add button. This will trigger the Non-Catalog Item product detail popup.

To delete a non-catalog item, click the Delete button or set the item’s quantity to zero.

If you would like to enable this feature, please contact Customer Support.
**Delete Non-Catalog Item**

**Edit Entity Settings: Edit Tax Codes setting**

For entities with Tax Code functionality enabled, a new setting will appear in Edit Entity Settings: Edit Tax Codes. This setting will default to Yes, which enables users to modify tax codes on a transaction by selecting a value from the Tax Code drop-down. If set to No, the Tax Code fields can only be edited through the Invoice tab.
Web Accessibility Compliance (Section 508): Contrast ratio, Language attribute, Headings

A language attribute and page headings have been added to heavily used tabs and menus for users who employ a screen reader for the easyPurchase application. The contrast ratio has also been modified for the menu options in the upper-right corner to make the options easier to read.
Bug Fixes

- Resolved issue where header account details popup did not display the correct split detail if line-item split was modified.
- Price filter no longer disappears when selecting a Level 2 PunchOut supplier in Shop Results.
- For Express and Crosstab reports created with theReporter, the Theme drop-down in the Layout tab has been corrected to include previously removed themes.
